REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Claims 1-12 are allowed over the prior art. Current invention teaches an electrical switch with liquid bridge formed between neighboring droplets during switching. The neighboring droplets of the current switch establishes electrical connection through "actively changing the shape of the liquid droplet while such droplets remain stationary with respect to the rest of the device as such, the shape of the liquid droplets is changes as a function of capillary action." Distinctively, the prior art, for example Kondoh requires confined pressure heating channels to open or closed its circuit. Applicant's arguments are persuasive and therefor are incorporated into this Reason for Allowance in its entirety. The liquid contact conducting through claimed "capillary action" in combination with the claimed limitations of the base claim are neither disclosed nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
